Job Summary

E-alphabits seeks motivated freshers or interns for Flutter development. Gain practical skills in building Android/iOS apps with offline support, REST APIs, and modern UI/UX, leading to potential full-time roles after 6 months.

Key Responsibilities

- Develop and maintain cross-platform mobile apps using Flutter and Dart for Android and iOS.
- Integrate Firebase for notifications, authentication, and offline database management (e.g., Firestore).
- Implement payment gateways, REST API integrations, and basic AI client features like chatbots or analytics.
- Design responsive UI/UX with Flutter widgets, state management (Provider/GetX), and app deployment to Play Store/App Store.
- Debug, test apps, and collaborate on live projects under senior guidance.

Requirements

- Pursuing or recently completed BCA/MCA/B.Tech in CS/IT or related fields.
- Basic knowledge of programming (Dart preferred)
- Familiarity with Git, Android Studio, and mobile development concepts is a plus.
- Strong problem-solving skills, eagerness to learn, and availability for full-time internship in Gota, Ahmedabad.

Internship Details

- Duration: 6 months (extendable), with opportunity for full-time employment based on performance.
- Location: Gota, Ahmedabad, Gujarat (on-site).
- Stipend: Competitive for freshers, plus certification, mentorship, and project portfolio building.
